

## A Unique Opportunity in Pig Medicine

**Bishopton Pig Team are looking for a new member to join them  
– read on to find out more...**

The Pig Department at Bishopton Veterinary Group have been looking after a large number of clients within the UK Pig Industry for many years and have built up a solid reputation for sound advice and knowledge. We are also heavily involved within research based projects that are close to the field, and support the profession and industry through direct input to the UK Pig Veterinary Society and the National Pig Association.

Four veterinary surgeons are dedicated to our pig work, providing health and production advice on farm, training our clients and other vets, along with second opinion advice around the UK and further afield.

An opportunity to expand our team has arisen and we are looking for an enthusiastic individual to join us. This would suit a new or recent graduate with an interest in population medicine and how to apply it practically on farm. There are also opportunities for involvement with a large array of research projects on farm through our sister company RAFT Solutions, with the possibility to progress to post graduate qualifications.

We are committed to training people as a business, both with our team and our clients. No prior experience of pig medicine is required before application since all training would be provided either in house or through fully funded CPD. The learning curve would certainly be challenging and we are looking for an individual who wants to take up this opportunity within a supportive team environment.

Salary package would be commensurate with experience if applicable, and we would encourage new graduates to think about this opportunity as well as more experienced practitioners.

For an informal chat, please call the practice on 01765 602396, Option 1 + 1 and ask to speak to Duncan or Nigel, or email [duncan@bishoptonvets.co.uk](mailto:duncan@bishoptonvets.co.uk)
